**RECIPE:** Serving up a can-do attitude

"I want everybody to learn how to use the computer. You can't fear that you're going to screw up; you just have to get in there and say, 'Okay, I'm going to learn how to do this.' I'm pretty old and my life has proven to me generally that there are very few things that you can't reverse. You can't ever take back words that you say in anger, but you can usually change anything. And if you're very careful when you're setting up something you can go slowly and see, okay, well, this works and okay, that's not a problem."
