

FROM THE KITCHEN OF: Micheal Fettes

Alachua County District Library, Gainesville, FL

RECIPE: *Crafting a smart and easy laptop checkout plan*

"We created a ghost image, put it in a hidden partition, and using a flash drive with a run-time version of Ghost on it, we could redo the C: drive within 3 to 4 minutes between each use. Whatever the patrons have installed will be gone because we're re-writing the user partition. And it didn't take a long time and it was also very easy for non-technical staff to refresh it. All they had to do was basically insert the thumb drive and we set it up to boot off of USB. They essentially turned it off, put in the thumb drive, turned it on, and it re-wrote itself. And then it beeped at them when they were done."
